

Empower CAD and GIS professionals with a reliable, large-format printer that they can effectively share. High-quality professional output is sure to impress clients, while convenient technical and manageability features enable confident workteam printing.

IMPRESS YOUR CLIENTS WITH PROFESSIONAL-QUALITY PRINTS

- **Produce exacting detail and precise, accurate line quality.** Using the HP Three-black ink set—including a gray HP Vivera Ink—the system produces true neutral gray, accentuating the detail in your prints. Improved line accuracy to 0.1%⁽¹⁾ and 0.0423 mm minimum line width achieve outstanding horizontal-to-vertical line-width difference.
- **Present your professional best.** HP Vivera Inks were designed specifically for the HP Designjet T1100 Printer series to produce a wide range of vivid colors. With the addition of gray ink, you achieve more accurate color and true neutral gray. So your prints have smooth area fills, more depth, and more subtle contrasts, from the most vivid color to the softest tones.
- **Posters, presentations make a powerful impression.** Impress your audience. Produce outstanding image quality enabled by the matte black, photo black, and gray HP Vivera Inks in the Three-black ink set. Achieve hard-to-achieve tones like dark blacks and true neutral grays, even on glossy media, to bring a new level of clarity and professionalism to your work.
- **Your work is preserved with the smudge-resistant prints produced by fast-drying HP Vivera Inks.** Rest assured that all the time and effort you put into each print is preserved. HP Vivera Inks achieve excellent dry times, producing prints with excellent smudge-resistance on a range of HP media.
- **Count on consistent, professional prints with over 20 Original HP media substrates—designed together with HP Vivera inks to work better together.**

FAST CAD AND GIS PRINTING ENABLES MORE EFFICIENT WORKTEAMS

- **Print CAD & GIS projects quickly and accurately—up to 35 seconds/A1 page⁽²⁾—with HP Scalable Printing Technology.** Print projects up to 3 times faster than with the HP Designjet 800 Printer.⁽³⁾ Print an A1 page in up to 35 seconds.⁽²⁾ HP's innovative, large printhead technology is designed for accurate placement of smaller drops at high speed for consistent results even at fast print speeds.
- **In-printer processing architecture frees up workstations and processes complex files quickly.** With this printer's in-printer processing architecture, files are processed in the printer rather than on your workstation so you can send a file to the printer and get back to work quickly. The printer's internal 40 GB hard disk provides a large buffer, reducing the chance that your workstation will lock up when printing large files.
- **Change print job priorities and reprint copies efficiently with the Job Center and HP's embedded Web server.** Unexpected issues, like urgent print jobs, are a reality. Better accommodate these situations with greater control over print jobs and print functions. Control the progress and the priorities of your print jobs without walking to the printer. With batch printing, instead of opening individual files and changing their settings, drag and drop your batch of files to the Job Center⁽⁴⁾ for easy reprinting.
- **Send jobs to the printer regardless of the media that's loaded and print jobs on the correct media every time.** Alerts displayed by HP Easy Printer Care let you know when your print job requires you to change media. But these alerts do not stop the printer; it continues printing other jobs until you decide to swap media, so your colleagues will not be disturbed.
- **HP Jetdirect networking, including IPv6 and Gigabit Ethernet, supports high-speed printing and workteam productivity—now and in the future.**

REST ASSURED—UPGRADE TO A PRINTER YOU KNOW YOU CAN COUNT ON

- **Send and print large jobs reliably over the network with in-printer processing architecture.** Busy network, no problem. With embedded HP-GL/2 and PostScript,⁽⁵⁾ your files travel swiftly over the Internet without complication, allowing you to print even the most complex files.
- **Color emulation ensures that the colors produced are consistent—across other HP Designjet printers.⁽⁶⁾** With color emulation capabilities, the HP Designjet T1100 Printer series can emulate the colors produced on HP Designjet 500, HP Designjet 800, and HP Designjet 1000 printers so you see the colors you expect and can more effectively and confidently utilize the resources you have.
- **The colors on the printed page match the colors on your screen with HP Professional Color Technologies.** The HP Designjet T1100 Printer series enables you to get the right colors on the first print with screen-to-print matching through a range of HP Professional Color Technologies, including enhanced sRGB and AdobeRGB printing, Closed Loop Color calibration, TIFF and JPEG with embedded ICC profiles, offset emulation, Black Point compensation, and Pantone calibration.⁽⁵⁾
- **Safe purchase—this printer readily connects to operating systems and applications thanks to HP-GL/2.** With embedded HP-GL/2 and RTL, most CAD applications on a wide range of operating systems are supported. HP printer drivers are specially optimized for AutoCAD, providing Windows ease of use with the performance of HDI.

(1) $\pm 0.1\%$ of the specified vector length or ± 0.1 mm (whichever greater) at 23° C (73° F), 50–60% relative humidity, on E/AO printing material in Best or Normal mode with HP Matte Film.

(2) Mechanical printing time on plain media in Fast mode with Economode on.

(3) Based on 4 copies of 50 A1 pages using normal print quality on plain paper. Intervention time not included.

(4) Files supported by HP-GL/2, CALS/G4

(5) Embedded PostScript support is available on HP Designjet T1100ps printers only.

(6) This printer can emulate HP Designjet 500, HP Designjet 800, and HP Designjet 1000 printers.
